Video Loss Detectors

New single channel and four channel model design

Single channel unit (VLOSS-1)

New to our standalone accessory line are the two models of Video Loss Detectors. The VLOSS-1 is a single channel video signal detector that monitors a camera signal and upon video loss triggers a relay to trip a device of your choosing. Possibilities include alarms, sirens, shutting off gas pumps, etc.. The VLOSS-4 is an integrated four video channel unit with four outputs.

Four channel unit (VLOSS-4)
